

WHO WE ARE

The Asturias Maldonado Foundation (FAM) is a California 501 (c) (3) whose mission is to support and direct educational projects of high-impact, stimulating development and well-being for rural families in Guatemala.

OUR OBJECTIVES ARE TO

- ◆ Promote excellence in education for rural children;
- ◆ Support the school organic garden & family garden fostering food independence; and,
- ◆ Educate our students and their families on responsible care of natural resources.

WHO WE SERVE

Since 2011, FAM has served 19 communities in the San Marcos area—from providing water filters, training families in nutritional independence, to partnering with public schools to work together on projects for the benefit of local children. FAM continuously seeks ways to positively impact the lives of the rural families of San Marcos.

EXCELLENCE IN EDUCATION

FAM offers students an integrated educational program from preschool to high school. Every child receives the school supplies they need to study, transportation to and from school, nutritious snacks and a well-rounded education. The program includes class-room instruction, books, computer lab and activities such as sports, music and art. FAM places a special focus on keeping girls in school, as they are often the first to drop out. High school graduates—often the first in their family to do so—receive guidance on furthering their education.

OUR COMMITMENT

For more than one hundred years, Asturias Maldonado family members have provided health and education services to rural farm families. The Asturias Maldonado Foundation continues to promote and support the ideals and aspirations that have supported these families for generations.

ASTURIAS MALDONADO FOUNDATION 2018 ANNUAL REPORT
